DIAMOND DRILLING

- Diamond Drilling is the most versatile and efficient method of forming holes and opening in a wide range of hard material From heavy reinforced concrete and natural Stone and Bricks.

Key Features :-

- Dust and vibration free.
- Flexible power sources.
- Light weight Drilling.
- High Performance Automated Regs.
- Hole Size from 8mm To 600mm.
- New slurry containment and Re-cycling system allows wet drilling in furnished area.
- Low noise output.
- The most precise method of forming Service penetration.
- Fully Trained labor & Operators.
- Fully equipped mobile workforce covering.
- No dust due to dry cutting.
- The job Area.
- Clean & Safe.
- Dry drilling when required.
